

**NORMAN**<sup>®</sup>  
SHUTTERS. BLINDS. SHADES.

**PerfectSheer**  
Balancing light, privacy and view

**LIGHT CONTROL AND PRIVACY OPTIONS** - Pick and Choose PerfectSheer's fabrics to suit your needs. Select light filtering vanes for an ambient glow throughout your home during the day or room darkening vanes for maximum light control and privacy during the night or day. Also you can choose matching aluminium or wood light guards to block unwanted light bleed from around the sides of the shade and a PVC light block at the top of the shade.

**VERSATILITY** - PerfectSheer's design incorporates two layers of sheer drapery connected by a soft light filtering or room darkening fabric vane. This creates a luxurious soft window covering with the combined versatility of a venetian blind and roller shade...Offering the best of both worlds all in one shade.

**WIDE RANGE OF LUXURIOUS FABRICS** - Choose from a wide range of PerfectSheer's luxurious fabrics to match with or provide contrast with your existing décor.

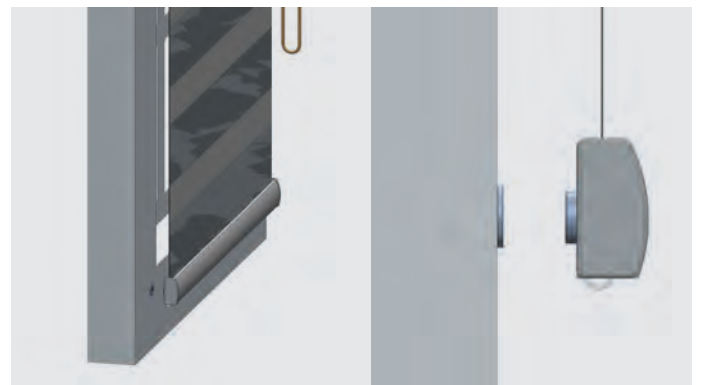

**WOVEN SEAM ASSEMBLY** - Most manufacturers join their 3D fabrics by either gluing, sewing or heat fusing. PerfectSheer's three layers of fabric are woven together to stay looking great under the harsh Australian sun.

**SUPERIOR CLOSURE** - PerfectSheer's unique design and innovative operating system offers the snuggest vane closure of any product in its category, providing homeowners the ultimate in privacy and light control.

**ELEGANT AND FUNCTIONAL TOP TREATMENTS** - The PerfectSheer range comes with a selection of decorative valance and fascia top treatments which provides an elegant finish to the top of the shade and minimises light bleed.

**MAGNETIC HOLD DOWN OPTION** - Magnetic hold down is optional for the hem bar on request and is available in 14 colours to match with the shade hardware or surrounding joinery. No more clanging hem bars in the middle of the night keeping you and your family awake.
